

## Triplets

In previous lessons you have divided the quarter notes into two equal parts ( $\text{♩} = \text{♪} \text{ ♪}$ ) and into four equal parts ( $\text{♩} = \text{♩♩♩♩}$ ). It may also be divided into three equal parts: ( $\text{♩} = \text{♩} \text{ ♩} \text{ ♩}$ ).

## Scenes That Are Brightest

WALLACE

Be certain you play each of the notes in the triplet figure with equal value. A common error is committed by playing the figure in this way:  $\text{♩} \text{ ♩} \text{ ♩}$ . Do not rush the first two notes.
